problem in detail and/or what's to do:

The delivered carburetor will be disassembled and cleaned to determine the scope of work and material costs. A cost estimate will only be provided upon express request or before very complex repairs. Every carburetor is checked as far as possible after the repair and delivered with the basic setting. A final and precise setting can ultimately only be carried out in the vehicle with the engine running. Before installing the carburetor, check the intake manifold for leaks and only use fresh fuel.

Auszuführende Arbeiten:

- disassembling and cleaning
- replacing wearing parts if necessary
- jetting (we need separate information for this)
